TECHNICAL SKILLS

Languages: Python, Core Java, SQL, HTML/CSS

Frameworks: keras, Scikit-learn, Pandas, Numpy, Spark

Generative AI: Langchain, OpenAI, Hugging face, Sentence-transformers, Diffusion Models, GANs, VAEs, Transformers, Diffusers

Database: SQL, MySQL, PostgreSQL, ChromaDB, pgVector, MongoDB, Elastic Vector Database, FAISS

Developer tools: PyCharm, Git, Visual Studio, Postman, Jupyter Notebook, Google Colab, Docker

Models : GPT-3.5, GPT-4, BERT, LLaMA, LLaMA 2, T5

AI Techniques : Natural Language Processing (NLP), Reinforcement Learning, Data Preprocessing, Feature Engineering, Self-Supervised Learning, Computer Vision (Image Generation, OpenCV, CLIP)

MLOps : Model Deployment, Continuous Integration/Continuous Deployment (CI/CD)

EXPERIENCE

Senior Software Developer[Generative AI] - Tech Mahindra [Makers Lab] Nov 2024 – Present
Bengaluru

- Engineered and delivered an AI-powered enterprise search scratch, enabling users to retrieve assets and query enterprise databases using natural language through advanced prompt engineering, attention mapping, and few-shot learning techniques; optimized for scalability and adopted as the client's primary Data Marketplace product.
- Optimizing performance by skipping redundant LLM calls for UI filters and auto-suggestions.
- Proven extensibility of the architecture beyond databases, successfully demonstrating adaptability to other enterprise data sources like CRMs (e.g., Salesforce) for unified chat-based data access, positioning the solution as a scalable product for future enterprise-wide deployments.
- Building an agentic AI-based migration automation system that interacted with Jenkins servers, analyzed execution logs, handled authentication seamlessly, communicated with enterprise APIs through HTTP calls, and provided contextual information to LLMs to intelligently automate actions and issue resolution across the migration workflow.

Senior Software Developer - Indegene + Bitcot Aug 2023 – Aug 2024
Bengaluru

- Developed a Generative AI Chatbot Creator Platform using , enabling users to build custom chatbots that can answer queries with accuracy. The platform supports diverse knowledge sources including images, text files, CSV, JSON, PPT, and even databases.
- Integrated a Generative AI-powered product recommendation engine leveraging the RAG approach with LangChain, ChromaDB, and PGVector to deliver more accurate and context-aware responses.
- Implemented an enterprise search solution with AWS Kendra, optimizing access to 1,000+ PDFs for improved user experience.

Senior Software Engineer - Apisero Mar 2022 – July 2023
Bangalore

- Automated integration with Salesforce, Guidewire, and Symbility through the MuleSoft API, achieving a 50% reduction in data update cycles.
- Collaborated with stakeholders to architect integration solutions and conducted rigorous testing for reliability and performance.
- Leveraged Agile methodologies for effective project management and cross-functional collaboration, delivering high-quality software solutions.

Software Developer - ICICI Lombard GIC Ltd. Aug 2020 – Feb 2022
Mumbai

Product Prediction Model

- Developed a machine learning model using deep learning techniques to predict product success.
 - Conducted data preprocessing and feature engineering to analyze customer behavior for targeted marketing.
 - Created a customer segmentation algorithm utilizing insights from NLP and reinforcement learning.
- SMS Engine(Samadhaan)**

- Developed and designed an engine from scratch for customer communication via applications and upgraded our centralized ILESB services for hassle-free integration.
- Finalised business requirement and delivered the engine within the minimum time possible using technologies like Django and PostgreSQL.
- The engine improved the overall performance ratio from 98.8% to 99.4% and also decreased the turnaround time for message delivery.

EDUCATION

National Institute Of Technology Karnataka

Master of Computer Application.

Surathkal

July, 2017 – May 2020

Welingkar Institute of Management Development and Research

PGDM (Finance)

Mumbai

July, 2020 – May 2022

Maharaja Ranjit Singh

Bachelor of Computer Application.

Indore

July, 2014 – May 2017

CERTIFICATIONS

1. Certified ScrumMaster® (ScrumAlliance)

Certificate ID: 001046716

Feb, 2020 – Feb, 2024

2. Machine Learning (Coursera)

<https://www.coursera.org/account/accomplishments/certificate/RXZPRNTHBK9X>

ACHIEVEMENT AND EXTRACURRICULAR ACTIVITIES

- * Secured AIR-80 in NIMCET-2017.
- * Competed at the state level in Muay Thai martial arts, demonstrating discipline, resilience, and a commitment to personal growth and physical fitness.
- * Management Team Head in IGNITE (2018) cultural fest.
- * Secured AIR-65 in BIT-2017 MCA Entrance exam.
